

## Curriculum Vitae

### PERSONAL INFORMATION

Name and Surname: Álvaro Moya

ID: 43.355.699

Date of Birth: March 29, 2001

Address: Alemania 785, San Rafael, Mendoza

Phone: (+54)9 2604-045096

Email: moyaalvaroo07@gmail.com

### PROFESSIONAL PROFILE

I am a programmer with experience in web and backend development, specializing in technologies such as JavaScript, React, Node.js, Spring Boot, and Django. I have skills in databases, data analysis using SQL and Power BI, and technology project management. I am looking for opportunities where I can apply my knowledge and continue growing within a dynamic team.

### EDUCATION

University Technician in Programming – National Technological University (UTN), San Rafael

Status: Completed

Additional Courses:

- Oracle SQL – Official certification
- Power BI Course – Video course with certification

### TECHNICAL SKILLS

- Programming Languages: JavaScript (React, Node.js), Python (Django), Java (Spring Boot), PHP, SQL, MySQL
- Databases: Design, administration, and optimization with MySQL, PostgreSQL, and Oracle SQL
- Web Development: Frontend with React.js and backend with Node.js and Spring Boot
- Data Analysis & Visualization: Power BI, SQL
- Other Tools: Git/GitHub, Docker, REST APIs, Linux (currently learning)

- Networking: LAN and Wireless network configuration and administration

## RELEVANT WORK EXPERIENCE

### Software Development & Programming

- Freelancer: Development of projects using JavaScript, Python, and PHP
- Team Project: Created a web platform using React, Django, and MySQL for hotel booking and payment systems
- AI Chatbot: Integrated a chatbot with Gemini using Node.js
- Dashboard with Django: Created an interactive interface to visualize business data

### Other Related Jobs

- Video Editing (Remote): Production and editing of videos for events, ads, and online courses
- Customer Service: Experience in supermarkets, bars, and travel agencies
- Administrative Tasks: Accounting and operational management in various industries

## HIGHLIGHTED PROJECTS

### 1. Inventory Management System

- Technologies: PHP, MySQL, JavaScript, CSS
- Description: Platform to register, search, and update inventories in real time

### 2. Dynamic Website

- Technologies: React, Node.js, MySQL
- Description: Development of an interactive website with user authentication and database connection

### 3. Data Analysis

- Technologies: Python, SQL, Power BI
- Description: Data processing and visualization to optimize business processes

## LANGUAGES

- Spanish: Native
- English: Intermediate (technical reading, documentation, and basic communication)

## **AVAILABILITY & CAREER OBJECTIVE**

- Availability: Full-time

- Objective: To join a company where I can contribute innovative solutions with modern technologies, especially in web development, backend, and data analysis. I am motivated to improve processes and grow professionally in challenging environments.
